

Everything has a beginning and that is why we have gone back to first principles with the new M'START: simplicity in design and ease of assembly giving a no frills machine but with the looks, durability and technological features expected of a 21st century wash machine.

To meet the demand for a rollover which is simple yet capable of offering high quality wash programs, the M'START includes a wide range of optional extras such as side high pressure, high shine foamy wax or high pressure disk wheelwash.

M'START is designed for facilities with the capacity to wash 800 to 1200 vehicles a month and is the perfect machine for those wishing to start off in the vehicle wash business in the most profitable way.

The new M'START has leading edge technology which includes a programmable CPU, variable speed drives and power transducers working in coordination under the control of software specially designed for this model and capable of guaranteeing a gentle but effective wash.

M'START
