

FLEX5

DESIGNED TO
TRANSFORM
THE CAR WASH WORLD

ISTOBAL

THE FIRST ROLLOVER
TRANSFORMABLE IN 3 OR 5 BRUSHES

SPECIFICATIONS

FLEX5

- ◆ THE FIRST
TRANSFORMABLE
ROLLOVER

FLEX5 is the first and only rollover in the market that is capable of using either five or three brushes without changing machines and in just 1 working day.

PATENTED

◆ YOUR NEEDS ARE OUR COMMAND

The effectiveness and reliability typical of the M'NEX range is now paralleled by FLEX5: an unprecedented rollover with total flexibility and no limits. Because *if needs change in your car wash facility, your car wash machine can also change.*

◆ FROM 3 TO 5 BRUSHES AND VICE VERSA

ISTOBAL's *R&D* department has managed to develop and patent a *new rollover concept defined by versatility* and conversion from 3 to 5 brushes, thus meeting our customers' present and future needs without making any new investments.

FLEX5 with 3 brushes

FLEX5 with 5 brushes

DATA SHEET

◆ 3 BRUSHES ZENIT FAIRING

FLEX

Brush travel and lift by means of frequency converters, with 10° tilt of vertical brushes for better wash control

Link-it brush system: available in link-feel, link-foam and link-tex materials and in 17 colours

Flexible configuration to customise programmes, speed and product dosing control

Optimised rinse and wax circuits for a perfect finish

Maximum customisation flexibility: 19 colours available, large variety of fairings, light signs and pictograms

5 BRUSHES
XTRA FAIRING

EX5

Includes 3rd wheel in 5-brush version for additional structure stability

Great variety of drying options: full dryer, horizontal dryer with adjustable diffuser and Smartflow dryer

Up to 30% shorter wash and dry times compared to 3-brush machine

All measurements in mm [ft-in].

CUSTOMISATION

19 different colours available for FLEX5 customisation: you can choose just one colour for the structure or combine two of them on the structure and the fairings, customising your machine to the full.

FAIRINGS

Available for the Zenit model (lateral or complete) for the 3 and 5 brush version, and for the Xtra model, exclusively for the 5 brush version with the possibility of incorporating Sferic light signs or LED phase lights on the top fairing.

LIGHT SIGNS AND PICTOGRAMS

They are the perfect option to indicate the different FLEX5 wash phases. Available versions: Linear, Sferic and Boomerang, and wide variety of pictograms with attractive designs.

LINK-IT BRUSHES

Discover the flexibility of ISTOBAL's link-it brush system: you can choose up to three different materials (alone or in combination) and 17 different colours.

SMARTFLOW DRYER

In addition to the full dryer (sides + top scanner), FLEX5 can incorporate the new Smartflow horizontal dryer patented by ISTOBAL to substantially reduce electricity use and noise levels.

WHEEL WASH

As the ideal complement to high pressures, we have several wheel wash systems to ensure thorough rim cleaning: standard or double telescopic disk wheel wash + high pressure with 4 or 8 nozzles, or high pressure wheel wash with 6 rotating nozzles.

ACTIVE MOUSSE GREEN

A new effective and surprising foam. Its attractive and refreshing colour creates a positive feel during the car wash process. The sensory experience is completed by a pleasant cherry smell.

COMMUNICATION SYSTEMS

The latest communication systems developed by our R&D department allow the FLEX5 to be monitored at all times: IW-Manager is our remote control and management software, and Screen Access is our remote access software for the command post.

PAYMENT TERMINALS

Connect-a and Codec are the new payment terminals designed with the latest intuitive technologies to offer clients a totally personalised and user-friendly experience. They both include modern payment systems intended to meet the specific needs of each individual customer.

GLOSSY TEARS

Latest-generation drying wax. It creates a rain-repellent layer on the vehicle surface. Visibility under wet conditions is considerably improved, increasing safety.
